

Weilgut MindPlan

Working in MindPlan helps you to stay on track. Unlike other one-dimensional applications that track your calendar or to do list, MindPlan allows you to treat your ideas as multi-dimensional: Ideas become clearer, timelines are more sure, and reporting features are easy to use. The clear and concise MindPlan project management solution provides you with sophisticated, but easy-to-use features.

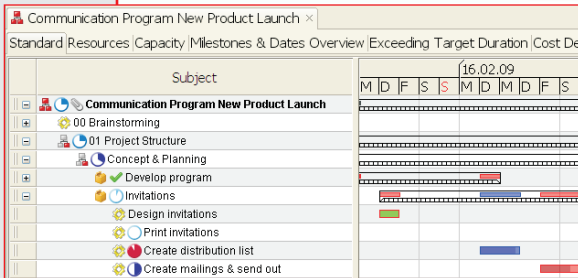

Work breakdown structure, flowcharts, concept structures, ...

With a Mind Map as graphical user interface, you can structure and visualize your ideas and any information very easily and fast – be it alone or in a team, be it in true or virtual teamwork. Cluster activities to work packages and insert all relevant meeting and workshop dates.

Planning & Scheduling

The step from the project work breakdown structure to a schedule is as easy as it is ingenious: simply switch from map to Gantt view. All activities, work packages and deliverables are clearly arranged on the left and can be planned now in a bar graph on the right.

Progress, Cost, and Resource Tracking

Benefit from sophisticated analyses to track progress, cost, and resource situation. Release your team from time-consuming status reports and inefficient tools without losing control. An analysis is not reduced to one MindPlan: Easily add other databases to get a complete overview on your team's resource and capacity situation or the entire planning and cost situation.

Subject	Start	Due date	Target duration	Actual duration	Diff. actual/target duration
Exceeding Target Duration	03.02.09	24.02.09	4	9	5
Positive duration deviation	03.02.09	24.02.09	4	9	5
200 - 210%	23.02.09	24.02.09	1	3	2
Print invitations	23.02.09	24.02.09	1	3	2
100 - 110%	03.02.09	05.02.09	3	6	3
Develop event program	03.02.09	05.02.09	3	6	3

Meeting & Workshop Management

Use MindPlan to establish an agenda, including automatic duration calculation. Then start the invitation directly from this agenda. MindPlan will create a Lotus Notes invitation for you with a tabular agenda and the defined personal mailing list. Send it to the participants with the push of a button; the recipients will accept the invitation as usual and enter the meeting as a date in their Notes calendar.

Meet with MindPlan

Strategy workshop June 2008

Starts at: 09:00
Ends at: 13:15
Members internal:
Peter Miller
Ed Brown
Location:
Room 115
Building E.31
Category: Strategic meeting

Status report

Starts at: 09:15
Duration: 60 minutes
Who: Ed Braun
Type: For information

Get ahead - strategies for the future

Starts at: 10:15
Duration: 60 minutes
Who: Ed Braun
Type: For discussion

Moderate and document everything during the meeting. Save time by setting the result of an agenda topic to Decided, Postponed, or Cancelled. After (or even at the end of) the meeting, MindPlan helps you to generate the minutes efficiently: To-Dos that you have inserted for an agenda item will be considered in an automated generation of the minutes.

Branch: Presentations for event part I

One node = one Lotus Notes document

That means: If you provide a project plan in MindPlan, you provide automatically a kind of project team room. Your MindPlan provides your team with a commonly shared project database. Store information of any kind in the appropriate place in the project structure. Save time and avoid redundant structuring and storing!
